

Clarifi COVID-19 Saliva Test

Gold-standard PCR Pooled Testing

for SCHOOLS

What is pooled testing?

Pooled testing allows schools to test a group (or pool) of up to 12 people at one time.

What is Clarifi COVID-19 pooled testing?

The Clarifi COVID-19 pooled testing process combines the ease and simplicity of our **saliva test** with the accuracy of PCR testing which received FDA Emergency Use Authorization (EUA) on September 22, 2020.

According to an FDA Reference Panel, the **Clarifi COVID-19 saliva test** was ranked as the most sensitive saliva test available in the US.

The Clarifi COVID-19 can detect infections at the earliest stages when individuals may be infectious but have not developed symptoms.

Why is Clarifi COVID-19 pooled testing right for you?

- Simple saliva collection device
 - Less invasive to collect
 - Allows persons to self-administer under supervision
 - Saves on staffing costs related to hiring medical personnel
- Results in 24 -48 hours
- Most sensitive saliva test on the market
- Ability to do immediate reflex testing on a positive pool
